

# Membership 2.0.1:

## Using Map View to lasso a group of members

(Note: This guide assumes you know about filters and lists)

MAY 2017

# How to lasso in a group of members: Map View

Use Map View to visually locate members living in a specific area, for example for a targeted mailing. Zoom into the area and use turf cut to trace an area. Then you can tag them or add them to a list

NOTES: It's best to begin – in the People tab - by finding a basic group (in Filter, ex: by city, postal code, or even the whole country or chapter) before you go to the Map View.

It seems to be a bit tricky at first, so don't try to do this at the last minute. But once you get the hang of it you will find it a really valuable tool to organize local meetings.

See this page for instructions:

[http://nationbuilder.com/how\\_to\\_use\\_map\\_view\\_and\\_turf\\_cut](http://nationbuilder.com/how_to_use_map_view_and_turf_cut)

# FINDING YOUR BASE GROUP

As with other map applications, move towards your country/chapter and zoom in. (Tip: move the map from right to left to go east. Ex: to find a group in Asia-Pacific, move the screen across the Americas, the Atlantic and Europe/Eurasia).

The screenshot shows a map application interface. At the top, there is a toolbar with icons for user selection, filters, and map controls. The main map area displays a world map with various countries labeled in multiple languages. Several data points are visible on the map: 1,302 in Germany, 112 in France, and 1 in Cabo Verde. A 'Turf Cut' button is located on the right side of the map. At the bottom, there are buttons for 'Clear turfs' and 'Reset defaults'.

Every person has been mapped

Clear turfs Reset defaults

## FINDING YOUR SUB-GROUP

- 1 Use the usual map zoom + bar to scroll in to the area you wish to target.
- 2 Hover your mouse over a black dot or a black numbered circle to see data on the individual member(s) living there.

**To Lasso a group and add to a list (for a mailing for instance):**

- 3 Click the Turf Cut button.

- 4 Click as instructed to outline your target geographical area.

- 5 Click anywhere in the area you have selected to open the list screen. Name your list (the slug is created automatically) and you can share it with another point person if you wish.
